EDUCATION

CUMULATIVE GPA: 3.96

Cornell University | Ithaca, New York
B.S. Applied Economics and Management
Minor in Computer Science

Expected Graduation June 2020
Major GPA: 3.90
Total GPA: 3.82

Mission College | Santa Clara, California
2017 - 2018
Computer Science

GPA: 4.00

WORK EXPERIENCE

Notita | Creator

February 2019 - Present

- Aggregate and source live financial/market data to provide dashboard services and a data pipeline for traders.
- Develop and backtest algorithmic trading strategies primarily based on academic research findings.

Cornell University | Undergraduate Research Assistant | David Ng

October 2018 - Present

- In the process of training a machine learning (Naive Bayes) model to classify and parse through business reports. This model will give us a binary probability estimate on whether the language in the reports indicate an effect on earnings through climate change.

Cornell University | Undergraduate Researcher | Aija Leiponen

September 2018 - Present

- Scraped, analyzed, and helped build visualization models pertaining to patent holding companies & patent assertion entities, which was used to conduct a study on whether patent hoarding is detrimental to economic innovation.
- Expedited and automated a semester long data collection process (120,000 data points) to 2 weeks.
- Conducting research on data privacy trends across various industries.

Milpitas City Hall | Intern

Jan 2017 – May 2018

- Collected and analyzed qualitative survey data, which was then used to forecast and brainstorm different solutions and problems. Developed and helped pass a permit system for limited parking in a residential area.
- Analyzed Milpitas city budget expenditures and reported principal data to the mayor.
- Organized with Rich Tran (Mayor of Milpitas) on town halls and community outreach projects.

ACTIVITIES AND PERSONAL PROJECTS

Madden Coin Shop

- Monopolized game collectibles by monitoring market data and identified trends in supply and demand, uncovering opportunities in a rapidly changing virtual game environment.
- Utilized Bootstrap and jQuery frameworks to create a website selling virtual collectables, leading to approximately \$4000 in profit.
- Sourced potential customers through social media and negotiated charges with customers.
- Implemented a semi-automatic goods delivery system with PayPal and Google Sheets.

Triangular Arbitrage Cryptocurrency Bot

- Exploited inefficiencies in low-volume cryptocurrency exchanges through the triangular arbitrage strategy.
- Used python and NumPy to test trading theory and concluded that there was already overcrowdedness in the market, so the strategy was inefficient.

NBA Statistical Analysis

- Implemented Scrapy and Selenium frameworks to scrape recent sports data from NBA's website and used analytics (matplotlib, pandas, NumPy) to understand and visualize the advanced statistics.
- Constructed a hustle index per game statistic by aggregating various statistics indicating effort.

Chess for Kids | Program Creator/Director

- Coordinated with library officials and volunteers to create a walk-in chess program for K-8 children.
- Focused classes on strategy, logic, piece value, board control, and good sportsmanship.

TECHNICAL SKILLS AND INTERESTS

Programming: Python (Advanced) · Java (Intermediate) · JavaScript (Familiar)

Web/Media: HTML · CSS · Flask · jQuery · Bootstrap

Analytics: SQL · Matplotlib · NumPy · Pandas · Seaborn · Plotly · Excel · Scikit-Learn · A/B Testing · Google Analytics

Awards: Dyson Diversity Scholar (1st Generation) · Dorchester Collection Case Finalist

Hobbies: Philosophy · Catan · 49ers (NFL) · Warriors (NBA) · Writing · Chess · Baduk · Cooking · Kaggle · Poker
